# What is Hair Transplantation?

## Hair Transplantation :-

It is a surgical technique that moves individual hair follicles (follicular unit extraction FUE) from a part of the body called the 'donor site' to bald or balding part of the body known as the 'recipient site' (follicular unit transplantation FUT). It is primarily used to treat male pattern baldness

# DiponEd's Products Supporting Hair Transplantation

# 1: MT-ATP Solution

- For Maximizing Hair transplant graft viability and enhancing engraftment
- Grafts or FUE units can be stored in the MT ATP solution for many hours without losing viability
- Once engrafted the hair follicles grow faster by 25%
- The hair follicles graft retention improves by 15% to 25%

# DiponEd's Post Hair Transplantation Products

## 2: DiCell Matrix lotion

- Facilitating scalp hair multiplication at the donor area.
- Improves / faster wound healing in the wounded donor part of the FUE procedures
- Contains extracellular matrix proteins like fibronectin, collagen, integrins, and supportive Growth factors

# 3: KERATO GROW

- It's a product containing growth factors like IGF, EGF, VEGF, PDGF, FGF2 etc that help elongation and growth of hair
- Stimulates hair follicles
- Increases the number of good hairs per follicle or improves density
- Available as a product in spray format
- Apply 2 times daily , just spray and leave it
- Also available as a personalized spray, made from the patients own platelet and stem cell growth factors concentrate.
- Also recommended as a post PRP maintenance therapy

## 4: PG2Hair Spray

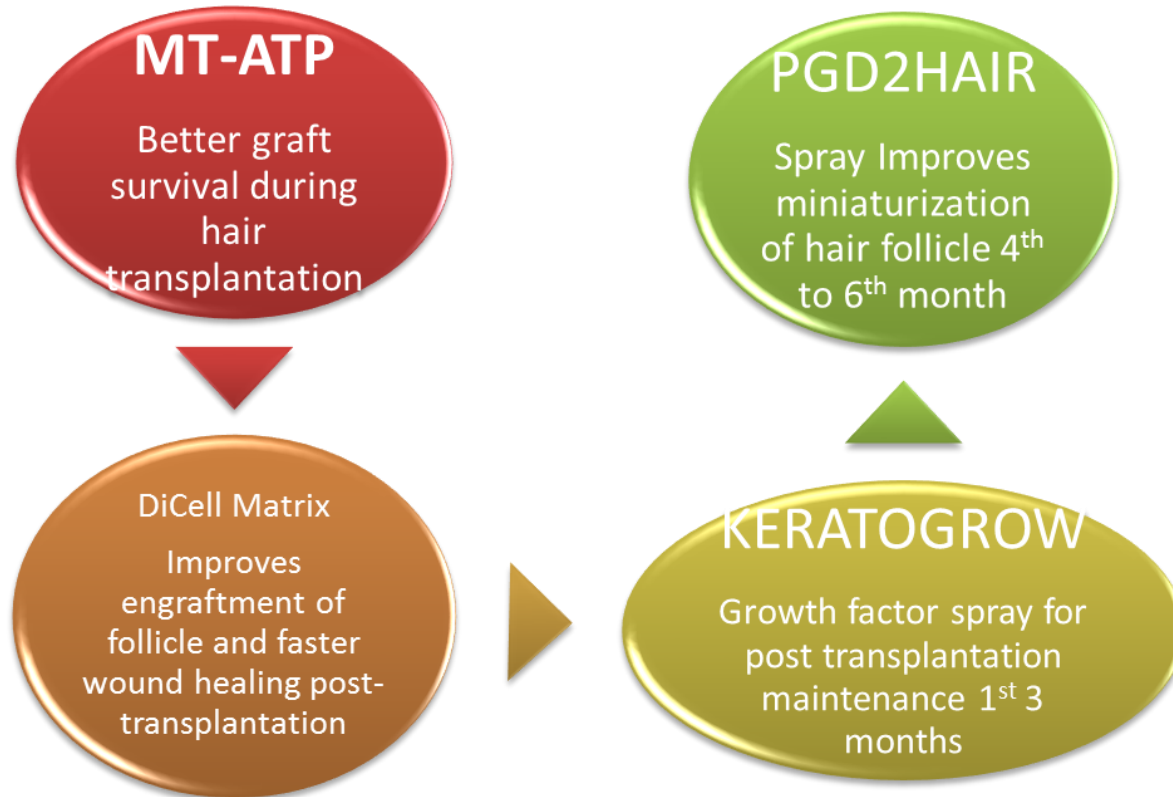

- It is a natural botanical prostaglandin d2 inhibitor spray
- Recommended on post transplantation hair growth
- Recommended on miniaturized and thinning hairs in male and female without doing any transplants
- Recommended for normal care and increasing hair shaft thickness and for male body hairs

# DiponEd's 360: Hair Regeneration & Transplant Support 6 months Program

## 5: STEMED Haircare Capsules

- Increases microcirculation in the scalp to increase nutritional supply to hair follicles
- Antiaging and geriatric support
- Increases immunity and skin texture and elasticity
- Recommended 2 times a day

## 6: DTox Capsules

- Chelate heavy metals from blood
- Removes plasticizers from blood
- Helps in better skin and stronger hair
- Recommended 2 a day

*Thank You*
